NIAC and its extraordinary mission have been featured in over 40 publications, both technical and mainstream.

5/23/07

Ad Astra has given NIAC permission to post an Op-Ed by Matthew Silver that was not posted online.

Ad Astra

Photonics Spectra

The May printed issue of the Photonics Spectra magazine featured an article on Young Bae's NIAC funded concept, Photon Tether Formation Flight (PTFF) and his recent successful demonstration of Photonic Laser Thruster (PLT). The article was entitled "Can Laser Propulsion Stabilize Satellites? Scientist demonstrates force of 35 μ N on intracavity mirror."

Centauri Dreams

4/19/07

A Centauri Dreams article on Devon Crowe's space habitats also mentions and provides a link to Webcter Cash's New Worlds Imager.

Advanced Nanotechnology

4/16/07

An article highlighting Devon Crowe's study on space habitat.

The Futures Channel

4/11/07

Leonard David of the Futures Channel has put together a great page on some concepts funded by NIAC.

Military and Aerospace Electronics

4/1/07

The concept Photon Tether Formation Flight being developed by Dr. Young Bae of the Bae Institute is described in an article released in the April issue of the internet magazine Military and Aerospace Electronics.
