The Commission. **Report of the Commission to Assess United States National Security Space Management and Organization**

Available online at: <http://www.defenselink.mil/pubs/space20010111.html>

Written by a panel which included current Secretary of Defense Donald Rumsfeld, this report supports the U.S. Space Command vision for the intensive militarization of space. This report provides the Commission's assessment of the organization and management of space activities in support of U.S. national security.

Department of Defense. **Space Technology Guide, FY2000-2001**

This document provides an overview of current efforts across the government from the Department of Defense to NASA and the Department of Energy to develop technologies which will be useful for military space programs.

Available online at: <http://www.c3i.osd.mil/org/c3is/spacesys/STGMainbody.pdf>

Book call no.: 358.80973 L223m

Assesses the military space challenges facing the Air Force and the nation in light of the findings and recommendations of the Space Commission. The author reviews the Air Force's involvement in space since its creation as an independent service in 1947; examines the circumstances that occasioned the commission's creation and the conceptual and organizational roadblocks that have impeded a more rapid growth of U.S. military space capability; and enumerates the challenges facing the Air Force with respect to space. Chapter titles include: The Air Force's Struggle for Space ([PDF](#)), Air and Space Versus "Aerospace" ([PDF](#)), The Space Commission and Its Impact ([PDF](#)), On Space Control and Space Force Application ([PDF](#)), The Road Ahead ([PDF](#))

Sills, Larry G. **Space-Based Global Strike: Understanding Strategic and Military Implications**. Maxwell AFB, AL, Center for Strategy and Technology, 2001 50 p.

Book call no.: 358.840973 S584s

The purpose of this study is to examine the concept of prompt *space-based global* strikes. In order to contribute to the debate about its potential benefits and problems, this study addresses the effects of cultural mindsets and forces. It examines how prompt precision strikes through *space* could provide an important set of options in future crises that are beyond the capabilities of current U.S. military forces. Finally, this study raises questions that the U.S. Air Force must consider about the future of aerospace missions.
